

Coding Challenge Week 7 Day 1

Create a Javascript application that lets the user search for books under a particular language -

Book Library

Enter Language here

Title	Author	Country	Language	Link	Pages	Year
Things Fall Apart	Chinua Achebe	Nigeria	English	https://en.wikipedia.org/wiki/Things_Fall_Apart	209	1958
Pride and Prejudice	Jane Austen	United Kingdom	English	https://en.wikipedia.org/wiki/Pride_and_Prejudice	226	1813
Wuthering Heights	Emily Brontë	United Kingdom	English	https://en.wikipedia.org/wiki/Wuthering_Heights	342	1847
The Canterbury Tales	Geoffrey Chaucer	England	English	https://en.wikipedia.org/wiki/The_Canterbury_Tales	544	1450
Nostromo	Joseph Conrad	United Kingdom	English	https://en.wikipedia.org/wiki/Nostromo	320	1904

Use AJAX to load [books.json](#)

The main goal of this challenge is how well you are utilising caching. Use storage API to minimize the requests. Use an event handler to get the user input from the form.

Create DOM manipulation methods to show the search result using a table.
