

Design Challenge - Week 4 Day 3

The goal of this challenge is to understand the purpose of each component used in a website. Recreate the following components in a figma document and submit the same. You can get inspiration from anywhere, but the design should stay inside the context, for example if a modal is asked, you are expected to design just the modal, removing the unnecessary details. Follow the design guidelines which were taught today.

1. NavBar which contains a logo on the left, some general options (with dropdowns), and specific options (like contact, about, FAQ)
2. A login form with a remember me option, along with sign in with google and facebook options.
3. A dialog box asking to print the bank statement containing from and to date fields, with a print and cancel button options.

Remember, this is purposefully made vague to ignite your design skills, so come up with your wildest creativity adhering to the guidelines. Use all your color contrast, typography techniques.
